Expertise

Programming Languages:
- Python
- Javascript
- SQL

Web Development:
- ReactJS
- Django
- HTML
- CSS
- TailwindCSS

Database Management:
- Postgresql
- MySQL

Version Control:
- Git
- Github

Containerization:
- Docker

ANTHONY MBAYA

Experience

Personal Project
Recipe Web Application
2023 - 2024

- My project is a recipe management app built with React, Tailwind CSS, and other libraries like React Router and React Icons. It allows users to add, view, and save favorite recipes. The app displays recipes in card format, and users need to authenticate to access detailed recipe information. I'm also using a Django REST API as the backend, where users can register and log in, and recipes are stored in the backend database.

Education

Mount Kenya University
2022 - Expected Complete (2025)
Bachelor of Business Information Technology

St. Mary's High School - Lushangonyi
2018 - 2022
Computer Packages

Language

- English
